

**DECISION**  
**regulating the use of radio frequency channels from the 3.5 GHz band**

1. By the Radio Frequency Allocation Plan in Montenegro, the frequency band of 3410-3600MHz is allocated for fixed wireless access (FWA) in compliance with CEPT/ERC/REC T/R 13-04 Recommendation.
2. The frequency band of 3400-3410MHz is allocated for the work of terrestrial, aeronautical and maritime radars, as well as for radio-amateur service.
3. The frequency band of 3410-3600MHz is divided into 25 two-way radio channels with channel spacing of 3.5MHz and duplex spacing of 100 MHz in compliance with CEPT/ERC/REC T/R 14-03 Recommendation, Annex B. The table below illustrates the way of grouping frequency channels from the 3.5GHz frequency band.

Ordinal number of the channel	Block	Block width [MHz]	Lower band [MHz]	Upper band [MHz]
1-4	A	2x14	3410.0-3424.0	3510.0-3524.0
5	Guard channel	2x3.5	3424.0-3427.5	3524.0-3527.5
6-11	B	2x21	3427.5-3448.5	3527.5-3548.5
12	Guard channel	2x3.5	3448.5-3452.0	3548.5-3552.0
13-18	C	2x21	3452.0-3473.0	3552.0-3573.0
19	Guard channel	2x3.5	3473.0-3476.5	3573.0-3576.5
20-25	D	2x21	3476.5-3497.5	3576.5-3597.5

4. Radio channels with ordinal numbers 1-4 are grouped in the 2x14 MHz frequency block, which is allocated for the implementation of fixed wireless access on national or regional level.
5. Radio channels with ordinal numbers 6-11, 13-18 and 20-25 are grouped in three 2x21 MHz frequency blocks, which are allocated for the implementation of fixed wireless access on national level.
6. Radio channels with ordinal numbers 5, 12 and 19 are guard channels.
7. The manner of use of the frequencies from this band is to be in compliance with CEPT/ECC/REC 04-05 Recommendation.
8. This Decision enters into force on the eight day from the day of its publishing in the Official Gazette of the Republic of Montenegro.
